Anxiety changes brain chemistry, and ma

kes it easier for the mind to focus on the negative.

You're not only more likely to have a scary thought when you have anxiety

you're also more likely to focus on the thought, have the thought cause more anxiety, and

ultimately have more scary thoughts in the future.

We have a brain that processes i

nformation very deeply and feels emotions very vividly, compared to other people

. This trait is linked with many good qualities

empathy, creativity, and giftedness among them

but it also means we experience unsettling scenes very differently than other people.
