dificuldades para sair da marca número 1, £ do Tiradentes. Mas, no fim das contas, venceu os

piaienses / Jogada 10

O Botafogo conseguiu com o direito ao O O bet365, £ campanha

nas Copa São Paulo

The TL;DR version of this review is: surprising light,

extremely pocketable, does the job, not my dream charger but at >, the price it is well worth it.

We've covered a product of Lepow's before, the Moonstone. Like the Moon

stone, the Poki comes >, with a cloth carrying case that you can stash a USB cable in (it appears to come with a 6 ft >, USB-& MicroUSB,) or chuck your ID and

credit card in and use it as a wallet while you're out. It is >, actually the

first thing that stood out when I was looking at the device. The Moonstone is still

going strong >, with a friend of mine a year later.

The battery delivers a 90% conversion efficiency rating according to specs

on the >, manufacturer's website. Most batteries go from the high 70's to mid

80's. You want to see a higher number as >, this is how much power gets delivered with the rest being lost in conversion.

The Poki can charge and recharge at >, 2.1amps. This means you're not

stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should

>, be able to charge this in under five hours and with 90% conversion efficiency

you should have around 9000mAh of >, actual juice to spare. That should be enough

for at least three complete charges from dead to full for any >, smartphone

on the market today.

2.1 amp charging also means you're not going to spend ~7 hours charging

2.1 amp charging also means you're not going to spend ~7 hours charging
